Eder Negrete

Experience

Frontend Engineer - Grin Scooters / Grow Mobility - Early 2019 -

Grin (Mexico) merged with Yellow (Brazil), both micro-mobility companies, I was involved on the integration team that helped the stack / company merge. I'm currently working on the Grow Pay team, it's a wallet (webview) inside the Yellow and Grin app where you can send, receive money, pay services and more.

- Migration of the stack, and Architecture from Mustache with jQuery to Next.js
- Integrated Latino American payment providers (Conketa, MercadoPago, Adyen)
- Integration of Unit, e2e testing and continuous integration tools
- In charge of the performance KPI's and to maintain the best practices to achieve them
- Direct communication with the UX team to build the best experience possible for the user

Lead Frontend Developer - Rocket.la - mid 2018 - late 2018

Rocket is a Startup based in Mexico City that helps people to improve their financial status.

- Migrated the Frontend Architecture from Django to Vue
- In charge of the Pixel installation, maintenance and features
- Add features that impact the product hand by hand with the UX team
- Use tools to improve the app. (Segment, Google Data Studio, Autopilot)
- Built a bot (Express.js) to read real-time updates on a database and send data to Google Analytics

Sr Frontend Developer - Sngular - late 2017 - mid 2018

I did remote work for Madrid, Spain. I worked on an IoT app that reads traffic and cars data to make statistics and make traffic predictions.

- Build the dashboard to display the data (Angular 4)
- Made integration with Google Maps Api
- Build a Design System Platform
- Improved performance of the app

Sr Frontend Developer - Compropago - mid 2017 - late 2017

Compropago is a small-sized company that facilitates people to make online payments. I worked with them to help build the Frontend architecture of the sites in Vue.js.

- Refactored the architecture to work with web-components
- Made the analysis and implementation of the required services (Node.js, Express.js)

Frontend Developer Team Leader - Bbva Bancomer (Via Sngular) - 2016 - 2017

I worked as contractor at BBVA Bancomer, we created the new online banking experience. I contracted with them to build a strong team of Frontend Developers, build the new architecture of the app and migrate the current one to a new Framework developed by Bbva (based on Polymer).

- Developed and implemented the architecture of the new online banking experience
- Worked hand by hand with the UX team
- Developed web-components and established good practices to develop them
- Worked with Cells.js a Polymer based framework developed by BBVA
- Built the development environment on Express.js (User Auth, 16~ services, connection to PSQL, ES6)
- Team management

Extra stuff

- I like to write a lot, you can check some of my posts in Medium
- I love to give talks, in Mexico City I have given some talks about my experience in Javascript. Some slides are available at my slideshare
- I have imparted workshops in Mexico City, mainly about Vue.js, React.js and Polymer.

Keywords

React.js	Vue.js
Redux	Vuex
Vanilla Javascript	Node.js
Express.js	Koa.js
Sketch / Zeplin / Adobe xd usage	CSS / SaSS / Stylus / Less / BEM
SQL / PSQL / MySql	ECMAScript 6 +
PWA w/ React and Vue	SSR Next/Nuxt
